

**Have your say on proposals
for Crossrail 2:**

**Dalston, Tottenham Hale
and Seven Sisters**

Consultation closes on Friday 8 January 2016

MAYOR OF LONDON

What is Crossrail 2?

Crossrail 2 is a proposed new railway serving London and the wider South East. It would connect the National Rail networks in Surrey and Hertfordshire via new tunnels and stations between Wimbledon, Tottenham Hale and New Southgate linking in with London Underground, London Overground, Crossrail 1, National Rail, High Speed 1, High Speed 2, London Trams and international rail services.

Why do we need Crossrail 2?

London and the wider South East are growing rapidly. In London alone there are now a record 8.6 million people; this will increase to 10 million by 2030. These extra people will mean five million more journeys each day on the transport network. Overcrowding on the Tube is forecast to double by 2041, and National Rail services will face similar challenges.

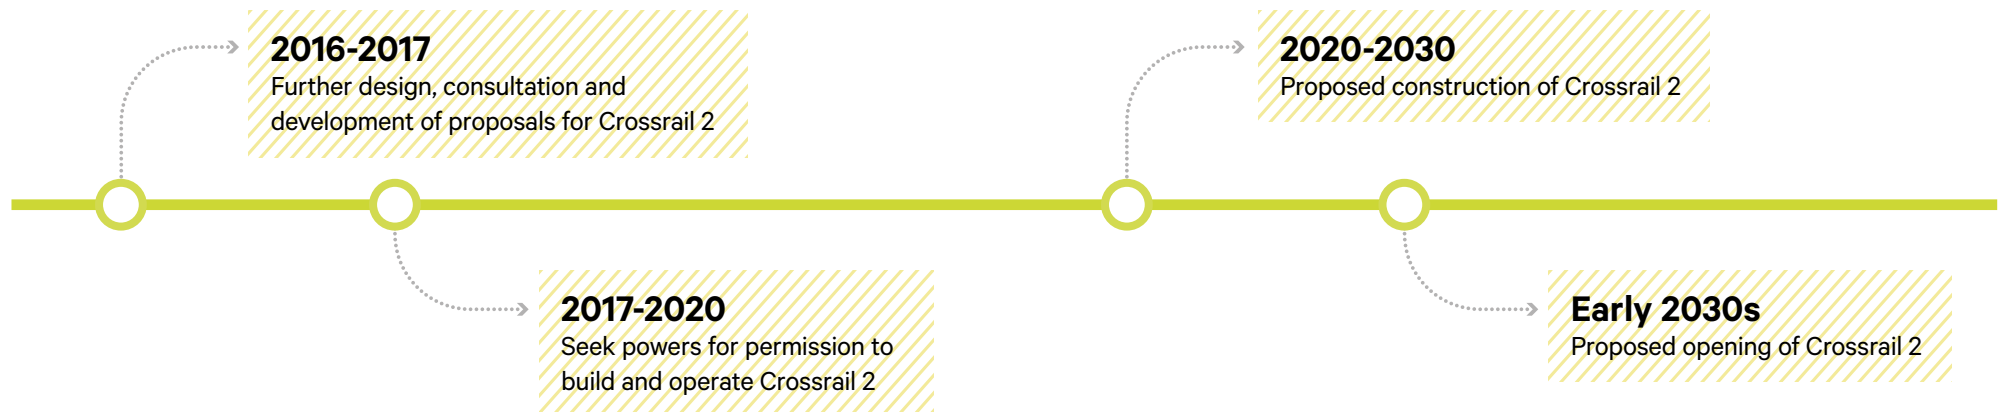

Transport improvements already underway across the network including Crossrail 1, which will help offset the pressure in the short term. But we need a plan to cope with longer term growth. Crossrail 2 will give our transport network the extra capacity we need to keep the wider South East working and growing, and to make life here better.

What are the benefits of Crossrail 2?

Crossrail 2 would:

- Transform travel across London and the wider South East, providing direct train services to destinations across the region
- Grow the UK economy, support 60,000 full-time jobs across the UK while Crossrail 2 is being built and, when operational, support 200,000 new jobs
- Provide new capacity for up to 270,000 more people travelling into London in peak periods, helping relieve crowding and congestion on the transport network
- Free up space on National Rail lines, allowing towns and cities like Cambridge, Southampton, Basingstoke, Woking, Guildford and Portsmouth to potentially benefit from more frequent services
- Provide step-free access at all stations on the proposed Crossrail 2 route
- Support regeneration and the development of around 200,000 new homes across the region

Crossrail 2 at Dalston, Seven Sisters and Tottenham Hale

People travelling to and from your area would benefit from:

- A reduction in overcrowding on services and at stations on the Victoria line, London Overground and National Rail
- New direct journey opportunities to central London and the wider South East
- Increased capacity and better interchanges provided at Tottenham Hale Station
- Improved journey times between north and south west London, and beyond
- Increased station and line capacity and direct interchange provided with London Overground at Dalston, as well as London Overground and the Victoria line at both Seven Sisters and South Tottenham

Proposals for Crossrail 2 in your area would involve:

- Building new platforms to link Seven Sisters to South Tottenham
- Building new entrances and exits at Seven Sisters and South Tottenham
- Providing step-free access from street level at Tottenham Hale, Seven Sisters, Dalston Junction, Dalston Kingsland and South Tottenham stations to new Crossrail 2 platforms
- Adding more tracks north of Tottenham Hale to create more capacity on the West Anglia Main Line
- Building a tunnel portal at Tottenham Hale to connect the new underground railway to existing National Rail tracks
- Building a shaft in Stamford Hill and in the Shoreditch Park area to provide ventilation and emergency access for the underground railway

Consultation on Crossrail 2

To date, we have held two consultations; the first was in summer 2013 on the principle of the scheme, and the second was in 2014 when we asked for views on specific route options relating to Hackney, Kensington and Chelsea and an extension to New Southgate. The Department for Transport also carried out a safeguarding consultation from November 2014 to January 2015. Safeguarding is a formal process undertaken by the Department for Transport to protect land required for major new infrastructure projects.

Feedback from these consultations, together with further scheme design, has helped develop the proposals for this consultation, which presents new information and invites comments on our proposals relating to:

- Station locations, entrances and exits
- Shaft locations for the tunnelled section of the scheme
- The construction sites required to build and operate the tunnelled section of the scheme
- Proposed service patterns

Development is still at an early stage. There will be more opportunity to provide feedback on Crossrail 2 as the scheme develops.
